# Software is compatible via an OPC DA Connector only

# Fully Integrated Process Automation Solutions

## CitectSCADA

CitectSCADA™, is an operating and monitoring software solution from Global Solutions, Software. It is also a component of PlantStruxure™, the Process Automation Architecture of Schneider Electric. With its powerful visualisation capabilities and operational features, it delivers actionable insight faster, enabling operators to respond quickly to process disturbances and thereby increase their effectiveness.

## CitectHistorian

CitectHistorian™ comprises the historian and portal functionalities of the solution, enabling you to accurately store data while connecting your production and business systems through its active data transfers and simple, easy-to-use reporting.

## Ampla

Ampla™, Schneider Electric's manufacturing execution software, enables organizations to improve their competitiveness in global markets, increase shareholder returns, increase operational efficiencies and reduce energy consumption.

SCADA & MES Software Global Support offers multi-level support services to our customers. This formalized structure of support is designed to optimize your investment in our operation and optimization software technology.
