¹ Vijeo Citect V7.30 Service Pack 1 is the minimum requirement to be compatible with Windows 8 and Windows Server 2012. Windows 8.1 is not confirmed at this time.

⁵ Vijeo Citect V7.20 Service Pack 5 is the minimum requirement to be compatible with Windows 8.1 and Windows Server 2012 R2.

³ Vijeo Citect V7.10 Service Pack 3 is the minimum requirement to be compatible with Windows 7.

^{*} Not supported as a database for Inventory. Other modules are supported.

[^] Windows 8.1 is not confirmed at this time

[#] Ampla supports the operating system on the client side only.

^{*} Ampla 2014 and 2013 Server is compatible with the 64 bit version only. The client supports 32 and 64 bit.

[•] Software is compatible with the 32 bit version only

^{*} Server only

[∞] Client only

Interoperability Matrix

Schneider Electric offers a wide range of software to meet customer needs. This matrix describes the interoperability among SCADA Expert Vijeo Citect™, Plant Operation Vijeo Historian™, Plant Operation Ampla™, as well as other Schneider Electric software.

Software is compatible via an OPC DA Connector only

Fully Integrated Process Automation Solutions

PlantStruxure™

PlantStruxure™ is a collaborative system that allows industrial and infrastructure companies to meet their automation needs and, at the same time, address growing energy management requirements. In a single environment, measured energy and process data can be analysed and used to achieve a holistically optimised plant.

SCADA Expert Vijeo Citect

Vijeo Citect™, is an operating and monitoring software solution from Global Solutions, Software. It is also a component of PlantStruxure™, the Process Automation Architecture of Schneider Electric. With its powerful visualisation capabilities and operational features, it delivers actionable insight faster, enabling operators to respond quickly to process disturbances and thereby increase their effectiveness.

Plant Operation Vijeo Historian

Vijeo Historian™ is the information management component of PlantStruxure. It comprises the historian and portal functionalities of the solution, enabling you to accurately store data while connecting your production and business systems through its active data transfers and simple, easy-to-use reporting.

Plant Operation Ampla

Ampla™, Schneider Electric's manufacturing execution software, enables organizations to improve their competitiveness in global markets, increase shareholder returns, increase operational efficiencies and reduce energy consumption.

SCADA & MES Software Global Support offers multi-level support services to our customers. This formalized structure of support is designed to optimize your investment in our operation and optimization software technology. Learn more: www.citect.schneider-electric.com
